

ABASTO EMPRESARIAL, S.A. DE C.V.

January 1, 2013

To whom it may concern,

Abasto Empresarial, S.A. de C.V. hereby certifies that all of the ingredients used in the formulation of the Blue Life[®] Probiotic, Blue 76[®] fertilizer have been obtained from non-genetically modified materials with an IP guarantee as appropriate and are in compliance with the requirements of Regulation (EC) 1830/2003 on the traceability and labeling of GMOs.

Also all raw materials are found on the EPA 4A list, and qualify under the regulation USDA NOP.

Therefore, the aforementioned products are conventional and neither subject to the labeling requirement of (EC) 1830/2003 nor to the authorization procedure of Regulation (EC) 1829/2003.

In addition to conventional ingredients used for aforementioned product formulation, conventional fermentation method has been implemented. Conventional fermentation processes include natural fermentation using proprietary cultures.

The proprietary culture strains have not been genetically modified according to Directive 2001/18/EC (which defines a genetically modified organism as “an organism, with the exception of human beings, the genetic material of which has been modified in a manner which does not occur naturally”).
